E18C - 4G TOUCHLESS CALLPOINT

This 7" face recognition door phone features touchless access, wireless 2-way audio and video communication, hassle-free management and more.

Featuring 7 unlocking methods: Face recognition, NFC, Mobile App, QR Code, Bluetooth, Card and PIN code.

Supporting 3 relay inputs and 2 relay outputs with the ability to store up to 20,000 faces and 50,000 events onto a TF card.

Save installation time on old buildings with outdated wiring. All you need for installation is a power supply.

R20KS - COMPACT SIP CALLPOINT

It's elegant design is ideal for environments with limited space. An IP65 rating protects it against rain, sleet or snow. Plus, the units intelligent temperature coping mechanisms mean it's able to work in a wide range of temperatures from -30°C to 65°C.

Featuring 2-way audio with voice activation detection and echo cancellation. The permanently operational camera has automatic high-intensity infrared LEDs for picture lighting during dark hours with an internal light sensor.

Featuring 4 door-unlocking methods to suit individual needs: PIN codes, IC/ID cards, NFC, Remote DTMF. Supports 2 inputs and 2 output relays (2A). Capable of remote entry over the internet.

C315W - INDOOR MONITOR

A powerful and compact 7" multifunctional Android indoor video intercom system with 2-way crystal clear audio communication via SIP 2.0 protocol.

This thin profile 7" ultra-clear touchscreen display comes with a wide range of customisable features.

The unit is powered by PoE or 12V DC connector with use on Wi-Fi or ethernet and supports 8 channel inputs and 1 embedded relay.

Available in a silvery grey edged bevel with a black fascia or a white edged bevel and fascia.

R29C - SIP VIDEO CALLPOINT

The world's first facial recognition Android door phone. Featuring a 7" touchscreen display with 2 way audio and visual monitoring and communication.

No cards or keypad codes are required, your face is your identity as this unit performs an AI-powered offline facial recognition for door access. This device is also fitted with a RF card reader.

This supports 3 input and output relays. This hard-wired IP video callpoint also supports 4G LTE communication with an optional 4G LTE module (R29C-L).

SmartPlus App

The SmartPlus App allows residents to see and talk to visitors, open doors and gates, monitor building entrances and issue virtual keys from their smartphones. Simplify property access management for property managers and owners by pairing this app with an Akuvox system.
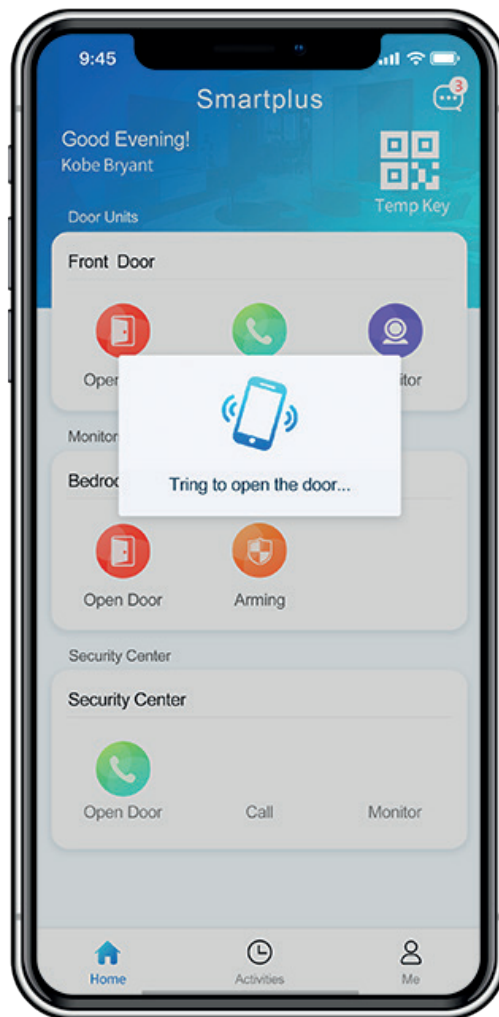

PREVIEW MODE

Instantly see who is at the entrance before answering the call

VIDEO CALL

See and talk to visitors with live video before buzzing them in remotely

UNLOCKING

Open doors/gates by using the "Open Door" button on the app or via Bluetooth through a phone call

VIRTUAL KEYS

Issue time-limited QR code keys and guest PINs, and share them with guests

NOTIFICATIONS

Receive instant push notifications of incoming calls on your smartphone

RELEASE LOGS

Real-time access to date- and time-stamped photos of all your door/gate release events

GET IT ON Google Play

Available on the App Store

MONITOR DESK STAND

The ITC7 Desk Stand for the C315 is a steel desktop stand, finished in black.

This stand is a simple and effective way to position the C315 on any horizontal surface, such as a desk or table.

The desk stand is simply pushed into place at the back of the intercom unit, which is secured with lugs, and it remains securely in place.

RAIN HOOD HOUSING

Rain hood housing for the Akuvox Intercom range.

This housing is designed for wall mounting or stand-alone gooseneck pole mounts and provides additional weather protection as well as glare reduction for the intercom's camera in bright sunlight.
